Micropython

1.1 源码下载

源码地址: <https://github.com/micropython/micropython>

进入网页可以看到一堆文件夹, 这个就是源码, 并且是最新的, 持续在更新。

但是不建议大家下载最新版, 我们可以去下载历史的一些版本源码来使用。因为 1.9.3 版本后的源码把 stm32 的 lib 去掉了, 但是源码里还需要用到 stm32 的库函数, 所以需要手动添加, 并且 1.8.4 版本后的 Makefile 需要自己修改。所以建议初学者不要追求新版本。本人最开始就是使用新版本, 导致花费了很多时间在编译源码上, 一直编一直错, 简直奔溃。这里我们下载 1.8.2 版本的源码进行移植。

dpgeorge	minimal/frozentest: Recompile now that mpy format changed.	Latest commit 62483bb 4 days ago
docs	docs/uos: Document extra requirements on stream objs passed to dupterm.	8 days ago
drivers	drivers/dht: Allow open-drain-high call to be DHT specific if needed.	a month ago
examples	examples/unix/ffi_example: Clean up and update the ffi example.	4 months ago
extmod	extmod/vfs_fat: Update for new oofatfs version.	9 hours ago
lib	lib/oofatfs: Update ffconf.h config for new oofatfs version.	9 hours ago
logo	all: Use the name MicroPython consistently in comments	2 years ago
mpy-cross	mpy-cross/Makefile: Also undefine MICROPY_FORCE_32BIT and CROSS_COMPILE.	7 months ago
ports	minimal/frozentest: Recompile now that mpy format changed.	9 hours ago
py	py/persistentcode: Define static qstr set to reduce size of mpy files.	9 hours ago
tests	py/persistentcode: Add a qstr window to save mpy files more efficiently.	9 hours ago
tools	py/persistentcode: Define static qstr set to reduce size of mpy files.	9 hours ago
